

ACCESSORIES

OD Remote Controller Option

When having our Programmable Digital Controller on the face of our Enclosure Air Conditioner does not fit your application, Thermal Edge offers the OD package.

The OD package moves the controller into your enclosure using a 10' cable along with a universal, 16 gauge powder coated steel mounting bracket. As shown below, the Enclosure Air Conditioner would have no hole on the face of the unit creating a secure application of our Enclosure Air Conditioner.

This accessory is available on all units including NEMA Type 12, 4 and 4X (304 Stainless Steel)

Having a smarter air conditioner is a good choice even when having an exposed Digital Controller may not be the best choice.

Pictured is our NEMA Type 4X Air Conditioner with OD Series remote controller option.
